# Urban Planning and Architectural Design for Sustainable Development (UPADSD)

## UPADSD 2<sup>nd</sup> Introduction

Sustainable Development Goals (UN, 2015) have become central for transformation of the Global City.

The three major themes of equality, infrastructure, and relationships between Humanity and the Planet find their focus point in the City.

Planning the sustainable development, in rural and urban areas, is present in all regions of the World. Accelerated urbanization has resulted in deterioration of the environment and loss of quality of life. Urban development can also aggravate problems faced by rural areas such as forests, mountain regions and coastal areas, amongst many others. Taking into consideration the interaction between different regions and developing new methodologies for monitoring, planning and implementation of novel strategies, can offer solutions mitigating environmental pollution and non-sustainable use of available resources.

Energy saving and eco-friendly building approaches have become an important part of modern development, which places special emphasis on resource optimization. Planning has a key role to play in ensuring that these solutions as well as new materials and processes are incorporated in the most efficient manner.

The 2<sup>nd</sup> Conference on “Urban Planning and Architectural Design for Sustainable Development” (UPADSD), to be held in Italy, follows the success of the first version which took place in Lecce, Italy during the year of 2015.

It has become apparent that planners, environmentalists, architects, engineers, policy makers and economists have to work together in order to ensure that planning and development can meet our present needs without comprising the ability of future generations.

UPADSD 2017 aims to bring together, scientists, urban planners, architects and other stakeholders from across the globe to discuss the latest scientific advances in the field.

### At the end of conference, you will:

- Learn new frameworks from all around the world successful case studies in urban planning and designing.
- Know more about sustainable urban development and its role.
- Know how to improve city life quality by using methods, plans and technological systems.
- Understand urban planning and designing trends.
- Design better urban spaces for citizens.
- Learn more about how to make the best use of urban and rural areas.
- How to deal with pollution and climate change in urban planning.
- Understand environmental impacts, referred to urban equity and access to urban resources.
- Learn about human smart city models and global case studies (i.e. smart districts, sustainable cities, e-governance, e-participation).

## UPADSD 2<sup>nd</sup> Publication

The conference proceedings will be published in full in ARChive International Journal. Only selected papers will be published in a book series by Springer.

## Palermo Visit Tour \*

**25 Ottobre 2017**

**25/10 h. 18:30-20 : giro di 1,5 h con guida turistica ufficiale**

Il tour attraversa vari quartieri del centro storico e racconta la storia dei principali monumenti cittadini. Partenza dalla Cattedrale, discesa del Cassaro verso i Quattro Canti, piazza Pretoria, Piazza Bellini, quindi verso la Kalsa via Piazza Sant'Anna, Piazza Rivoluzione, per concludere all' Orto Botanico. Potendo ritardare l'inizio della cena di gala si potrebbe partire dal Massimo, passare da Capo e quindi proseguire per la Cattedrale e riprendere il programma di cui sopra. **(in questo caso durata 2,5h)**

**prezzo €15 pp più iva 22% (per gruppi oltre i 15 partecipanti)**

**26/10 h. 19.30: Streaty tour notturno (lingua Inglese o Italiano):**

Tour dei mercati storici di Palermo, che vi farà provare le principali leccornie del nostro famoso street food nei posti dove e' nato. Il tour comprende diverse soste per mangiare, alla scoperta della vera Palermo, fuori dai circuiti turistici (le migliori friggitorie, le taverne popolari, i venditori ambulanti) pur rimanendo all'interno del centro storico Palermitano con i monumenti principali a fare da sfondo.

Ci sono due possibili percorsi: se la maggior parte dei partecipanti ha già aderito al tour del giorno prima, possiamo proporre un itinerario un pò diverso per evitare di tornare sempre negli stessi luoghi:

Partenza Teatro Massimo, giro del quartiere Olivella, Corso Vittorio Emanuele, Piazza Marina, porto della Cala, quartiere Vucciria, termina a Piazza San Domenico.

Altrimenti il giro classico è: Partenza Teatro Massimo, via Maqueda, Quattro Canti, Piazza Pretoria, Piazza Bellini, Piazza marina, quartiere Vucciria, termina Piazza San Domenico.

E' possibile comunicare la scelta anche in prossimità del convegno.

Per entrambe le opzioni, ci saranno assaggi di panelle, croccchè, panino con milza, sfincione, a seconda della disponibilità arancina o rascatura, bicchiere di vino in taverna e dolce (gelato o cannolicchio) e verrà distribuito ai partecipanti il Passaporto del Mangione.

Specifico che essendo un giro dello street food locale, non sono garantiti i posti a sedere visto che molto spesso si tratta di banchetti ambulanti.

Il tour non va bene per vegani o allergici ai latticini.

Scarpe comode consigliate.
